One (1) Postdoctoral Researcher Position

[Ref # FP7-0015]

The research group of Molecular Entomology/ Pesticide Science Lab of IMBB under the European Program 7th Framework programme HEALTH.2010.2.3.2-4-GA265660, entitled: “Controlling malaria by hitting the vector: New or Improved Vector Control Tools – AVECNET” (Program Coordinator Prof. Hilary Ranson) invites applications for one (1) Postdoctoral Research position.

Position Description: To employ an interdisciplinary systems approach to identify the key behavioral and physiological factors influencing the delivery of pyrethroid insecticides from the impregnated surfaces to the target site in the central nervous system of the mosquito.

Qualifications: PhD in Biology/Molecular Biology/Biochemistry; post-doctoral experience especially in immunocytochemistry and confocal microscopy. Excellent knowledge of mosquito dissections and understanding of lipids and hydrocarbon chemistry. Proven record of assay development skills and ability to collaborate in a team.

Contract Duration: 6 months, renewable based on the program's needs
Total budget: 2,000,00 € monthly cost
Envisaged starting date: 1 April 2016

Application submission: Interested candidates should submit their application electronically by March 4, 2016 @ 12.00

The application should consist of:
1. CV
2. Brief statement of interest
3. The names of two referees

./.
Evaluation procedure

Applications will be evaluated by a three-member evaluation committee. In case of interview procedure, candidates will be invited to participate in person or teleconference. The announcement of the results will be posted on the website of FORTH-IMBB. The selected candidate will be notified personally regarding the success of his/her application and will be requested to submit certified copies of his/her degrees. In the event that the documents submitted to not agree with the original application the candidate will be dismissed.

Information and submission of applications
