Evaluation report regarding Postdoctoral Researcher Position (Ref OPZ-0002) for the H2020-ICT-2015 GA687785 program entitled “Reliable novel liquid biopsy technology for early detection of colorectal cancer-LiqBiopSens”

The above position was advertised in the FORTH and <http://ec.europa.eu/euraxess/> sites for 15 days. As a response to the call, two applications were submitted, one from Dr D. Milioni and another one from Dr Ana Frangholo. The evaluation committee decided unanimously to select the former applicant, due to her very relevant CV (BSc Physics/PhD Biophysics) including expertise in all the “key” areas of the research project, i.e., acoustic wave biosensors and liposomes formation and their biophysical characterization.

The evaluation committee

Prof. Electra Gizeli

Ass. Prof. Kriton Kalantidis

Prof. Vasilios Bouriotis
