**Evaluation report regarding Postdoctoral Researcher Position (Ref OPZ-0003) for the H2020-ICT-2015 GA687785 program entitled “Reliable novel liquid biopsy technology for early detection of colorectal cancer-LiqBiopSens”**

The above position was advertised in the FORTH and <http://ec.europa.eu/euraxess/> sites for 15 days. As a response to the call, one application was submitted from Dr A. Pantazis. The evaluation committee decided unanimously to offer the position to the applicant, due to his very relevant CV (BSc Physics/PhD Microelectronics) including expertise in all the “key” areas of the research project, i.e., (design and fabrication of sensors and microsystems including acoustic devices, microfluidics and Lab-on-Chip).

The evaluation committee

Prof. Electra Gizeli

Ass. Prof. Kriton Kalantidis

Prof. Vasilios Bouriotis
