

ZIEŃ Piotr

Started his scientific career in Lublin, where he got a title Master of Science in UMCS Biotechnology Department, then PhD in the Department of Molecular Biology, KUL. Scientific development continued at the University of Western Ontario in Canada. In 2005 he started working at Adamed, where he led research and development projects, focusing on chemically synthesised and innovative biotechnological antineoplastic particles. Since 2010 he has been working for Polpharma S.A. Where from the very beginning was involved in creating a new structure -Polpharma Biologics. As Senior Project Manager and then Project Management Head, he was responsible for designing and commissioning Polpharma Biologics laboratories in Gdańsk and subsequent biotech drug development projects. Then, as research and development director, was responsible for laboratory operations and biotechnology projects aimed at developing therapeutic monoclonal antibodies from cell line development through analytical development and process development to transfer to production and quality departments.

Now as a Research and Development Director for Biotech Operations, he is responsible for setting up the biotechnology R&D department in DEMO S.A.

DEMO S.A. is willing to enter the biopharmaceutical sector. It will focus mainly on developing, manufacturing and marketing biosimilar therapeutic monoclonal antibodies. Laboratories of DEMO S.A in Agios Stefanos near Athens will cover the development of monoclonal antibodies from USP development up to GMP production.

He was also holding positions of Life Science Research Institute Director in Wrocław, National Coordinator of Bio Banking – BBMRI ERIC and Chief Scientific Officer in Bioton S.A.
