

Brain And Artificial Intelligence: A Fascinating Dynamic Interplay

26.03.24

(18:00 – 20:00)

Kastellakis Auditorium, Heraklion
Chamber of Commerce & Industry,
9 Koroneou str

- **Organization:**
Hellenic Society for Neuroscience
- **Auspices:**
University of Crete, Foundation for Research & Technology

PROGRAMME

Coordination

Emmanouil Froudarakis

Assistant Professor of Physiology-Neurophysiology, Medical School, University of Crete,
Collaborating Researcher, Institute of Molecular Biology - Biotechnology, Foundation for Research and Technology – Hellas,
Secretary, Hellenic Society for Neuroscience

Speakers

Unraveling the Brain-AI Dichotomy

Panayiota Poirazi

Director of Research, Institute of Molecular Biology - Biotechnology, Foundation for Research and Technology – Hellas,
Secretary General elect, Federation of European Neuroscience Societies

Brain-machine interfaces: Science fiction or reality?

Vassilis Raos

Professor of Physiology, Medical School, University of Crete
Collaborating Researcher, Institute of Applied & Computational Mathematics, Foundation for Research and Technology – Hellas,
President, Hellenic Society for Neuroscience

AI Applications in the Neurosciences. Some Ethical and Social Challenges

Stavroula Tsinorema

Professor of Modern & Contemporary Philosophy and Bioethics, Department of Philosophy and Social Studies, University of Crete
