

**Postdoctoral Fellow in Cellular & Molecular Immunology:**

Laboratory of Rheumatology, Autoimmunity and Inflammation.

University of Crete Medical School. Heraklion, Greece.

Job description: The Laboratory of Rheumatology, Autoimmunity and Inflammation at the University of Crete Medical School is seeking a motivated, qualified postdoctoral fellow with a background exposure to cellular or molecular immunology. Experience in animal models is desirable. This is a full-time position for 2 years with possible renewal. The candidate will be asked to participate in currently running projects and will be fully supported for starting novel projects in the context of the laboratory's interests.

Salary/Grant: The salary is at the post doc level

Laboratory: We are interested in the investigation of the pathogenesis of systemic autoimmune diseases, with a special interest in rheumatoid arthritis. Studies are conducted in human tissues and in animal models of autoimmunity, and include cellular/molecular immunology and metabolic assays as well as high-throughput studies. The Laboratory is affiliated with the University Hospital of Heraklion (Rheumatology Clinic), the Institute of Molecular Biology and Biotechnology (IMBB-FORTH) and has established collaborations with the Biomedical Research Foundation in Academy of Athens (BRFAA).
