

The Institute of Molecular Biology and Biotechnology (IMBB) invites applications from enthusiastic greek and international junior scientists for a postdoctoral training program to be funded by the General Secretariat of Research and Technology of Greece (www.gsrt.gr)

IMBB is a multidisciplinary biomedical research institute of the Foundation of Research and Technology-Hellas (FORTH-www.forth.gr) in Heraklion (Crete). Research at IMBB is of the highest international standards, addresses a wide spectrum of problems in biology and medicine and is supported by state-of-the-art facilities and competitive national and international funding. IMBB has extensive interactions with the other Institutes of FORTH, with many academic departments in Greece and with research establishments around the world.

Applicants must have obtained their doctorate degree (PhD or equivalent) within the last 7 years. To discuss details of the project proposals and the process of application interested applicants must contact as soon as possible the group leaders of IMBB. The deadline for applications is 20/11/2010. Contact details of all group leaders and their research interests can be found through the IMBB website: www.imbb.forth.gr
