

## SUCCESSFUL COMPLETION OF EMBO COURSES (17th-19th June 2024)

**David del Alamo** and **Thiago Carvalho** introduces to IMBB researchers the basic aspects of a **fellowship application process**.

**Poonam Bheda** talks about strategies of **scientific publication process**.

### *Feedback from our researchers:*

- “The instructors were very involved in the teaching process, gave us a lot of examples and tips on how to handle fellowships application, presentations, paper writing and more. The whole three-days experience was intense and very productive.” (Konstantinos)
- “I found the fellowship writing course to be extremely engaging and educational. It is a valuable experience that I believe every PhD student should have before completing their degree, as it offers insights into what it takes to be competitive in the academic job market.” (Simone)
- “The courses are very helpful, if not mandatory, for early career scientists and are an amazing opportunity for the IMBB people.” (Konstantinos)
- “Both EMBO workshops were very interesting and a good combination of theory and practice. I think that it is worth organizing them again.” (Teresa)
- “It was indeed very helpful and interesting courses, which I think are necessary for every researcher in any stage of their career.” (Konstantina)
