PRESS RELEASE

The story "An iron armor against fungal pathogens" for the research of Giorgos Chamilos group in IMBB is featured in the European "Research Matters" campaign

The work of George Chamilos' group at IMBB, on fighting infectious fungal diseases is featured at Research Matters. The Research Matters campaign is an initiative among European universities, research institutes, funding agencies, industry partners and communication professionals across Europe that aims to showcase that research is vital in shaping our future and addressing global challenges, and advocate for increased investment in research.
