

IMBB 40-year event: IMBB hosted an advanced laboratory exercise for excellent high school students

As part of the 40th-anniversary celebration of IMBB an advanced laboratory exercise was organized for final year high school students in October 2023. Students from all schools of Heraklion Prefecture were invited to apply. The event was advertised in all the schools (Lykia) of Heraklion Prefecture at the opening of the schools this September. We were seeking participants among 3rd-class students who wished to take part in an advanced laboratory exercise as part of the 40th-anniversary celebration of IMBB.

Six students were selected based on their excellent grades from the previous year (2nd class) in Biology, Chemistry, and Physics. On October 13th, they attended and participated in an advanced laboratory exercise at the IMBB with the active involvement and guidance of Dr. Elena Deligianni. On the same day, they received certificates from the director of the Institute, and coffee/cookies were offered to them, as well as their parents, relatives, and friends who were present at the award ceremony.

The event was organized by Dr Michail Kotsyfakis, Researcher IMBB.
